

Adapting the glaucoma care service in the times of the Covid-19 pandemic

The pandemic due to the SARS-CoV-2 virus has necessitated adaptations to eye care services including for glaucoma. The Community Eye Health Journal Issue 109 offers guidance and practical advice on adapting eye services, focusing on patient safety, personal protective equipment (PPE) and practitioner protection, and general cleaning and disinfection for infection prevention/control. Guidelines continue to evolve as more information about the disease becomes available.
